

MOHAMMED KABIR, MMSc, PMP, CSM, CSPO, CISM, ITIL

SR. PROGRAM MANAGER | BUSINESS TRANSFORMATION | CAPITAL MARKETS | AI | DATA | CLOUD | CYBERSECURITY

mokabir@gmail.com | 647-889-2036 | Toronto, Ontario | linkedin.com/in/mokabir

EXECUTIVE PROFILE

Senior Program and Transformation Leader with 22+ years of experience leading complex, multi-workstream programs across financial services, healthcare, manufacturing and the Ontario Public Service. Proven delivery of portfolios and programs up to \$60M, with global teams of 70+ resources, spanning AI/ML, enterprise data, Azure cloud, cybersecurity and IAM, ERP, Treasury, Capital Markets, supply chain and operating-model change. Connects business strategy, financial controls, data and technology execution through disciplined governance, executive decision support, organizational readiness and measurable adoption.

TRANSFORMATION PORTFOLIO

AI & Data Transformation: AI strategy, use-case discovery and portfolio prioritization; generative and agentic workflows using Microsoft Copilot, ChatGPT, Claude and Model Context Protocol (MCP); AI/ML forecasting using Azure Databricks; data and model readiness, governance, quality and lineage; responsible-AI controls, human oversight, adoption and value realization.

Cloud & Cybersecurity Transformation: Azure modernization, SOC workflow enablement, threat hunting, Microsoft Sentinel, Defender XDR, Splunk, IBM Guardium and ServiceNow; IAM/PAM, Zero Trust, security and privacy controls, regulatory compliance and operational resilience.

Business & Financial Transformation: Global Trade Systems, Treasury, cash-flow forecasting and FX hedging; Capital Markets and trading platforms; ERP, trade promotion management, supply chain, M&A integration, case management, regulatory reporting and process modernization.

Change Leadership: Stakeholder and change-impact assessment, communications, organizational readiness, training, adoption and reinforcement; target operating models, cutover, operational transition and benefits realization, informed by Prosci ADKAR and Kotter principles

CORE CAPABILITIES

Enterprise Program Strategy & Roadmaps | Portfolio Governance | Executive Reporting & Decision Support | Integrated Plans, Budgets & Forecasts | RAID, Dependencies & Change Control | Vendor / SI Leadership | Agile, Waterfall & Hybrid Delivery | Product & Platform Modernization | Data Migration & Integration | AI Governance & Adoption | Cloud Transformation | Cybersecurity & IAM | Business Process & Operating Model Transformation | Financial Controls & Regulatory Compliance | SIT / UAT / Cutover | Operational Readiness | Benefits & KPI Tracking

PROFESSIONAL EXPERIENCE

Ontario Public Service – Ministry of Public and Business Service Delivery and Procurement, Cyber Security Division | Jan 2026 – Present

Senior Project Manager – AI, Cybersecurity, Data & Cloud Transformation

- Lead an enterprise cybersecurity, data and AI transformation portfolio, converting operational challenges into prioritized use cases, roadmaps, governance, delivery plans and measurable success criteria.
- Advance generative and agentic AI use cases using Microsoft Copilot, ChatGPT, Claude and Model Context Protocol (MCP) to augment SOC investigation, cyber threat hunting, knowledge retrieval, evidence synthesis and security reporting.
- Establish AI governance covering business value, data access, privacy, cybersecurity, responsible use, human-in-the-loop controls, tool evaluation, auditability, adoption and performance measurement.
- Direct IBM Guardium vulnerability-assessment enablement and database coverage expansion, integrating ServiceNow workflows, data and CI validation, recurring scanning and enterprise reporting to improve vulnerability visibility and remediation prioritization.
- Lead security and analytics capabilities across Microsoft Sentinel, Defender XDR, Splunk, ServiceNow and Power BI, strengthening data integration, control validation, executive insight and operational readiness.
- Provide Directors, executive sponsors and the CISO organization with outcome-based reporting, options and recommendations; align Microsoft, IBM, Deloitte and ServiceNow around delivery accountability, AI adoption and sustainable value realization.

Becton Dickinson (BD) – Global MedTech | Oct 2024 – Dec 2025

Program Manager – AI/ML, Global Trade Systems, Treasury & Data Transformation

- Led a \$60M global transformation with 70+ resources across Global Trade Systems, Supply Chain, Treasury and Finance, integrating mainframe and DB2 environments with SAP HANA, JD Edwards, Microsoft SQL Server, Azure and enterprise data platforms.
- Directed the AI/ML program lifecycle for **cash-flow forecasting**—from business-case development and use-case prioritization through data readiness, model delivery, governance, adoption and performance monitoring.
- Delivered an AI/ML-enabled forecasting capability using Azure Databricks, SAP HANA and Power BI, improving cash-flow forecast accuracy by approximately 30% and enabling more timely liquidity and FX-hedging decisions.
- Established trusted data pipelines and governance controls across mainframe, DB2, SAP HANA, JD Edwards and Microsoft SQL Server, improving the quality, lineage and reliability of data used by AI models and executive reporting.
- Modernized Treasury processes covering cash-flow forecasting, FX exposure, hedging, liquidity and P&L reconciliation, connecting AI-generated insights with financial decision-making and operational workflows.
- Embedded **responsible-AI**, IAM, segregation-of-duties, auditability, sensitive-data protection and human oversight into solution design and delivery, supporting SOX and Three Lines of Defense requirements.
- Aligned Treasury, Finance, Supply Chain, Data Science, Architecture, Cybersecurity, regional operations and vendors around AI outcomes, model performance, delivery dependencies and business adoption.
- Led stakeholder impact assessment, communications, training, testing, cutover and adoption, moving the AI-enabled capability from technical implementation into sustained business use.

Mondelēz International – Global Food & Beverage | Nov 2022 – Sep 2024

Senior Program Manager – Global Trade Promotion Management (TPM) and M&A Transformation

- Led a \$40M global transformation with approximately 35 resources across North America, LATAM and EMEA, integrating Salesforce Trade Promotion Management, MuleSoft, SAP S/4HANA and legacy platforms.
- **Managed AI and advanced-analytics use** cases for promotion effectiveness, demand forecasting, trade-spend insights and exception identification, aligning business value, data readiness, platform dependencies and adoption.
- Integrated Sales, Finance and Supply Chain data across pricing, promotions, accruals, deductions, claims, inventory, forecasting and P&L reporting, enabling faster planning and more reliable AI-supported decision-making.
- Improved operating efficiency by approximately 25% and reduced costs by approximately 15% through workflow automation, process standardization, platform integration and disciplined vendor and scope management.
- Directed Product, Data, Architecture, Engineering, Finance, Sales and Supply Chain teams while aligning Accenture, Infosys, SAP, Salesforce and PwC around delivery outcomes, data governance and value realization.
- Led the Clif Bar acquisition integration and global operating-model change, managing stakeholder impacts, communications, training, readiness, cutover and adoption across regions and business functions.

TD Bank – Global Capital Markets & Wealth | Apr 2022 – Oct 2022

Senior Program Manager – Global Trading Desk Modernization

- Led cross-functional modernization across Capital Markets and Wealth, coordinating Business, Trading, Technology, Data, Risk, Audit, Compliance, Cybersecurity and Operations through integrated governance, planning and implementation.
- Supported front-to-back trading and investment workflows involving Murex, SimCorp and downstream platforms, including FX, fixed income, trade booking, valuation, settlement, reconciliation and exception management.
- Led requirements, backlog, data integration, SIT/UAT, release readiness and production implementation; facilitated executive decisions through options, risk analysis, recommendations and transparent ownership.

Ministry of Children, Community & Social Services (MCCSS) | Dec 2019 – Mar 2022

Senior Project Manager – ERP, Azure Cloud, Data & Organizational Transformation

- Led Azure cloud application, ERP, MDM and digital modernization initiatives, developing charters, business cases, integrated schedules, budgets, RAID logs and delivery strategies across multiple workstreams.

- Coordinated requirements, architecture, infrastructure readiness, data migration, security/privacy reviews, UAT, implementation and operational transition across IBM Cúram, Microsoft Dynamics, Oracle/SAP-related environments and government integrations.
- Embedded stakeholder engagement, accessibility, communications, training, cutover readiness and support-model planning within OPS governance, security, privacy, FIPPA/PHIPA and enterprise architecture standards.

Ontario Securities Commission (OSC) | May 2018 – Nov 2019

IT Program Manager – Capital Markets Data, MDM, Cybersecurity & Regulatory Transformation

- Led implementation of an OTC Derivatives Data Warehouse and master data capability, consolidating trading and reference data from DDR, CME, ICE, LEI, FX and market-data sources to improve regulatory insight, traceability and accessibility.
- Directed data migration, integration, reconciliation, taxonomy and quality controls across multiple platforms; translated regulatory reporting and oversight requirements into executable data and technology solutions.
- Partnered with IBM on Guardium implementation to strengthen monitoring and protection of sensitive regulatory data while supporting audit, privacy and cybersecurity requirements.
- Established PMO governance across scope, schedule, vendors, risks, dependencies, implementation and executive reporting using Clarity, Jira and Confluence.

Canada Pension Plan Investment Board (CPPIB) | Mar 2017 – Apr 2018

IT Program Manager – Murex, Trading Data & Investment Operations Modernization

- Led modernization of trading and investment operations involving Murex, SimCorp, Bloomberg, Informatica and downstream platforms, improving front-to-back processing, data integrity and operational visibility.
- Coordinated FX and derivatives workflows across options, forwards, futures and commodities, partnering with Portfolio Managers, Traders, Risk and Operations on valuation, settlement, exceptions and reconciliation.
- Directed trading-data integration, mapping, migration, testing and production readiness; provided oversight of IAM enhancements to strengthen access controls and protection of sensitive investment information.

ADDITIONAL TRANSFORMATION LEADERSHIP

- **Scotiabank** – Senior Agile Project Manager supporting a Capital Markets AML initiative across Business, Compliance, Risk, Operations, Data and Technology.
- **Export Development Canada** – Senior Project Manager delivering Capital Markets risk-model, data and reporting changes with executive governance and regulatory visibility.
- **John Hancock Financial** – IT Program Manager leading cloud, security, organizational readiness, compliance and disaster-recovery transition.
- **Cameco** – IT Program Manager directing multi-phase ERP modernization, vendor delivery, governance and business change across SAP/Oracle environments.
- **Saskatoon Health Region** – Agile Project Manager leading EHR migration, testing, cutover, clinical readiness and operational transition.
- Additional leadership experience includes **RBC**, **AIG Trading Desk**, **IBM** and Canadian public-sector organizations across enterprise technology, data, financial services and regulated transformation.

EDUCATION & CERTIFICATIONS

Education: Master of Management Science (MMSc), University of Waterloo | Bachelor of Computer Science, New York Institute of Technology | Associate of Applied Science, City University of New York

Certifications: PMP | PRINCE2 Practitioner | ITIL | CISM | CSM | CSPO

Professional Development: CISA coursework | AI/ML for Business Growth – MIT | Prompt Engineering – NJIT

Change Development: Change management training | Working knowledge of Prosci ADKAR and Kotter change principles | Stakeholder engagement | Organizational readiness | Adoption planning

TECHNOLOGY & DOMAIN PORTFOLIO

AI, Data & Analytics: Azure Databricks, AI/ML, SAP HANA, DB2, Microsoft SQL Server, Power BI, Tableau, MDM, ETL, data migration, data quality, lineage, reconciliation and governance, Microsoft Copilot, ChatGPT, Claude, Model Context Protocol (MCP), Generative AI & Agentic AI

Cloud, Cybersecurity & IAM: Microsoft Azure, AWS, Microsoft Sentinel, Defender XDR, Splunk, IBM Guardium, ServiceNow, IAM/PAM, SSO, MFA, PKI, RBAC/ABAC, Zero Trust, security and privacy controls

Enterprise & Financial Platforms: SAP S/4HANA, SAP HANA, JD Edwards, Salesforce TPM, MuleSoft, Murex, SimCorp, Bloomberg, Informatica, Oracle, Microsoft Dynamics, IBM Cúram and mainframe environments

Delivery Tools & Methods: Azure DevOps, Jira, Confluence, Clarity, MS Project, SharePoint | Agile, Scrum, SAFe, waterfall and hybrid delivery | RAID, RACI, stage gates, UAT, cutover and hypercare
